

## **Important Employee Parking Membership Notice**

### **Employee Parking Riders and Stakeholders:**

**Employee Parking provides parking to SEA based airport employees on a 24/7 basis.**

- **Our primary mission is to provide parking services to employees that are locally employed/based in SEA.**
- **The North Employee Parking Lot offers 4,100 stalls and supports 12,000 active parkers.**
- **Before the pandemic, parking membership reached this capacity. While no parker has ever been turned away, many frequently circled the lot at peak demand hours in search of a stall.**
- **After previous notice to tenant companies of the need to cap membership, effective July 1, 2020 Employee Parking imposed the parking CAP at 12,000 parkers.**
- **To reserve parking for all locally employed applicants, effective January 1, 2021, new applications from non-domiciled employees will no longer be accepted into the program.**

### **Operational Changes:**

- **Effective July 1, 2020** - Parking cards for new applicants are issued only when NEPL capacity is available, employment is verified by the tenant company authorizer and a badge verification process is completed.
  - When parking membership reaches capacity, all tenant companies will be notified, and employees that apply through the online application process will be placed in a queue and contacted when space becomes available (waitlist).
- **Effective January 1, 2021** - New applicants who are not locally employed/based in SEA will no longer be accepted into the program.
  - All current parkers (locally employed or not) who hold active memberships will maintain parking access.
  - Reference the Employee Parking policy and procedures website for additional information related to membership restrictions and expectations. [CLICK HERE for EP Policies & Procedures](#)
