

# SUSTAINABILITY OVERVIEW

DELTA AIR LINES

# Commitment to SBTi and Net Zero by 2050

**Short Term**  
10% SAF by 2030

**Medium Term**  
Science Based targets aligned with aviation guidance

**Long Term**  
Net zero 2050 throughout our entire value chain

# Fleet Renewal

**200+**  
Retired Aircraft

← REPLACED WITH →

**20-25%**  
More Fuel-efficient Models

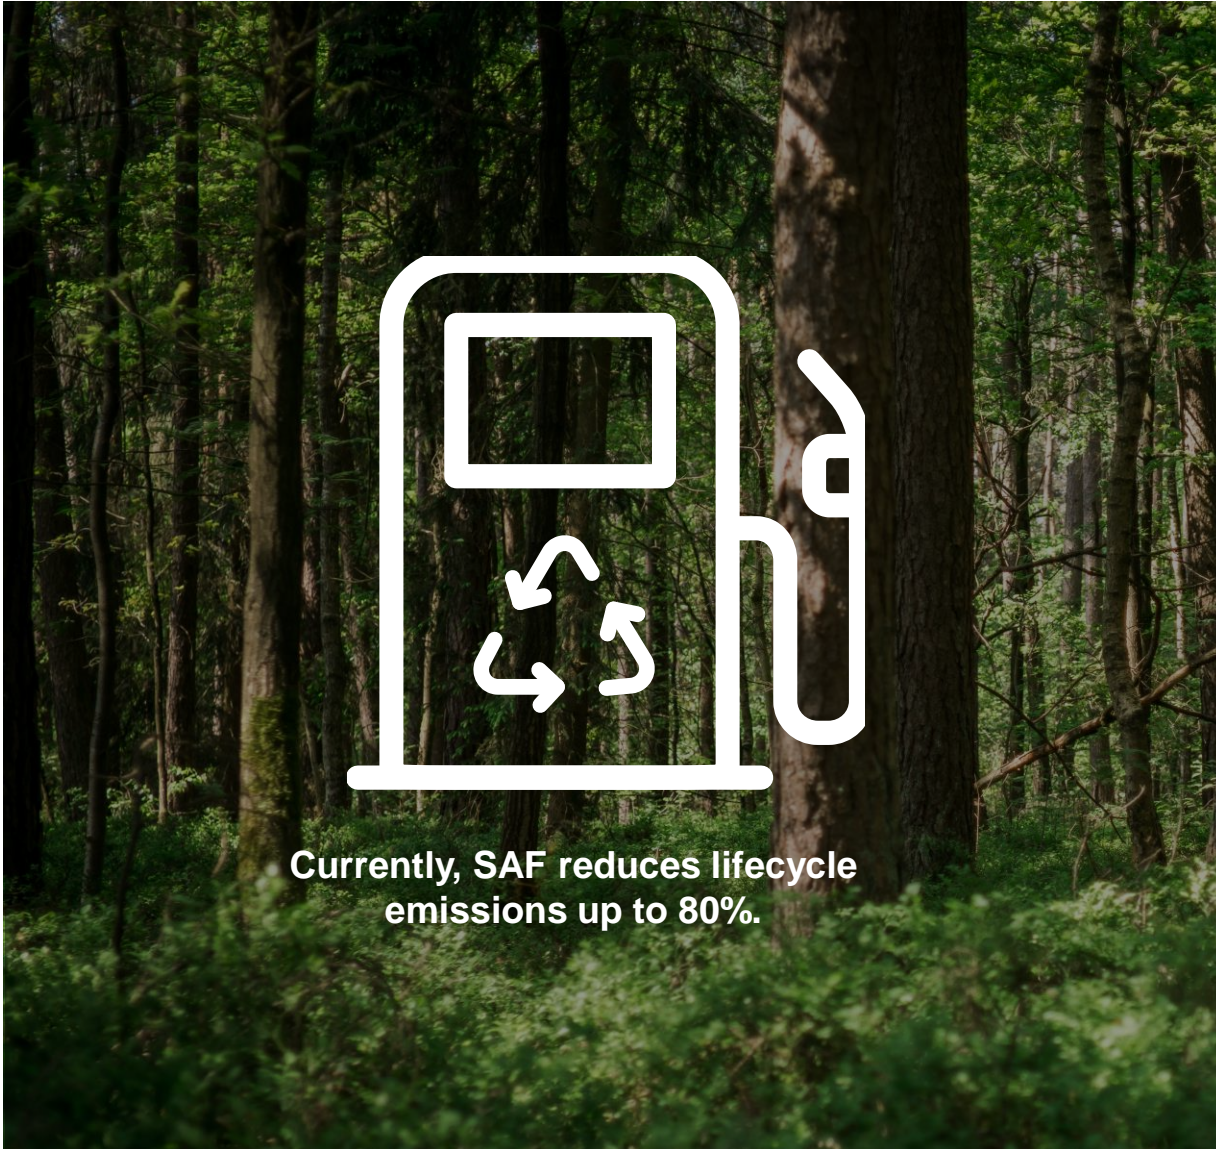

# Operational Improvements

Delta is increasing efficiency throughout the operation and rethinking opportunities to reduce waste through an internal Carbon Council, including through:

- Improved **arrival and departure procedures**
- **Lighter landing gear** to save fuel and lower local emissions
- **Streamlined** flight paths
- Onboard **weight reduction**
- **Close collaboration** with Air Traffic Organization
- **Electrification** of ground support equipment (GSE)

# Sustainable Aviation Fuel (SAF)

## Commitments

- Replacing **10%** of jet fuel refined from fossil fuel by the end of 2030
  - DL is halfway there with offtake agreements
- First Movers Coalition: 5% of 2030 fuel to have lifecycle GHG reduction of 85% or more
- Expanding **SAF agreements with Corporate and Agency** partners to increase SAF demand, consumption and production.

Achieving SAF goals require commitment and coordination with all stakeholders.
