6/10/2022	Completed	SEA - SEA25	The noise data from this site was not completely downloaded today.	The data is now available after being manually downloaded and processed successfully.	
6/1/2022	Completed	SEA - SEA01	The noise data from this site was not completely downloaded today.	SEA01 is located on the runway side of maintenance building, Port Staff required troubleshooting, modem rebooted. The data is now available after being manually downloaded and processed successfully.	
5/21/2022		SEA - SEA05	The noise data from this site was not completely downloaded today.	The data is now available after being manually downloaded and processed successfully.	
5/17/2022	Completed	SEA - SEA05	The noise data from this site was not completely downloaded today.	The data is now available after being manually downloaded and processed successfully.	
5/11/2022	Completed	SEA - SEA13	The noise data from this site was not completely downloaded for 2022-05-06 data.	The data is now available after being manually downloaded and processed successfully.	
4/26/2022	Completed	SEA - SEA16	The noise data from this site was not completely downloaded today.	The data is now available after being manually downloaded and processed successfully.	
4/4/2022	Completed	SEA - SEA05	The noise data from this site was not completely downloaded today.	The data is now available after being manually downloaded and processed successfully.	
3/6/2022	Completed	SEA-SEA20	The noise data from this site was not completely downloaded today.	The data is now available after being manually downloaded and processed successfully.	
2/27/2022	Completed	SEA - SEA19	The noise data from this site was not completely downloaded today.	The data is now available after being manually downloaded and processed successfully.	
2/27/2022	Completed	SEA - SEA19	The noise data from this site was not completely downloaded today.	The data is now available after being manually downloaded and processed successfully.	
2/22/2022	Completed	SEA - SEA15	The noise data from this site was not completely downloaded today.	The data is now available after being manually downloaded and processed successfully.	
2/11/2022	Completed	SEA - SEA18	The noise data from this site was not completely downloaded today.	The data is now available after being manually downloaded and processed successfully.	
2/8/2022	Completed	SEA - SEA06	The noise data from this site was not completely downloaded today.	Appears microphone mast and equipment box were hit by a vehicle. Major damage to structure and equipment in box. Noise monitoring equipment replaced; mast and equipment box repaired.	missing noise data from approximately 3:14pm on Feb 2 to 2:38pm on June 2, 2022
2/1/2022	Completed	SEA - SEA14	The noise data from this site was not completely downloaded today.	The data is now available after being manually downloaded and processed successfully.	
1/13/2022	Completed	SEA - SEA14	The noise data from this site was not completely downloaded today.	The data is now available after being manually downloaded and processed successfully.	
1/2/2022	Completed	A003	Requested SEA A003 noise data to be manually downloaded. Due to no aircraft noise events recorded after 16:32 but there were flights after this time over Vashon based upon flights pulled for a flight track map.	Note from Port Staff: We had snow during this time, perhaps the homeowner near A003 had some snow removal equipment. Looking at the LEQ report the community noise was much higher than the aircraft noise. Closing ticket.
